

Mentor Scheme

We wanted to create a programme to offer our candidates and clients personal and professional development by pairing experienced individuals with those seeking growth, guidance and insight in their career.

Participation in this is a collaborative, confidential and mutually beneficial experience, with no set timelines or duration expectations for either party.

This scheme is something we offer to all placed candidates, as well as individuals we work with who highlight developmental areas. We have an incredible network of specialist individuals who are seeking the opportunity to show some support to someone working their way up in their career.

Mentors can share relevant experience and expertise, providing guidance and constructive feedback, whilst listening and support their mentee with goal setting. This also offers mentors the opportunity to develop their skills for future management roles.

If you are interested in becoming a mentor, please get in touch with us today.
